Bachelor of Computer Application
Thiruvalluvar University

2019/06 – 2020/04

HSC
Anaikar Oriental (Arabic) Higher Secondary School

PROJECTS

Portfolio 📄

- Constructed a dynamic portfolio using HTML5, CSS3, and JavaScript, emphasizing clean and semantic code to ensure an optimal user experience.
- Implemented responsive design principles, guaranteeing a seamless and visually appealing presentation across various devices and screen sizes.
- Enhanced interactivity with JavaScript, incorporating features like smooth scrolling and engaging elements to captivate and retain user interest.

Adeen Restaurant

- Adeen Restaurant's website is a charming online platform designed to showcase the restaurant's offerings with an emphasis on an adorable and delightful design. The website is built using HTML, CSS3, and JavaScript, incorporating additional design elements to create a visually appealing and inviting user experience.
- Crafted an endearing and visually appealing design that reflects the unique charm and character of Adeen Restaurant, creating a welcoming online atmosphere.
- Ensured the website's layout is responsive, adapting seamlessly to different devices, including desktops, tablets, and smartphones, to provide an enjoyable experience for all users.

Weather Forecast

- Implemented a real-time data fetching mechanism to dynamically retrieve the latest weather information, ensuring users receive up-to-date and accurate forecasts.
- Integrated a weather API (such as OpenWeatherMap or Dark Sky) to seamlessly pull live weather data, including temperature, humidity, wind speed, and other relevant details.
- Incorporated geolocation services to automatically detect and display the weather for the user's current location, providing a personalized and relevant experience.

Todo List

- Implemented local storage functionality in JavaScript to store and persist the user's To-Do list data locally on their device.
- Designed an intuitive and user-friendly interface for adding, editing, and deleting tasks, ensuring a seamless and efficient user experience.
- Dynamically rendered the To-Do list content based on the data stored in the local storage, allowing users to access their tasks even after closing or refreshing the browser.
- Provided essential task management features, including the ability to add new tasks, mark tasks as complete, edit task details, and delete tasks and more on.
